

# KLAUDIA BERNAT

## RESUME

I outstand for my diligence and accuracy in completing the work assigned to me. I can think logically and I am a quick learner. I discovered programming after graduation, which is why I am learning though various courses. My goal is to become a competitive person in the IT job market as soon as possible.

## PROJECTS

“Weather app” – [link](#)

Technologies: Java, JavaFX, Maven, junit5, WireMock

Allows to see forecast for two cities you want. It also shows forecast for next 4 days. It uses data from OpenWeatherMap API.

“Budżet domowy” – [link](#), [Website link](#)

Technologies: PHP, HTML, CSS, JS, Bootstrap, jQuery, MySQL, Composer

It is a web version of my budget application. In this version you can see your finances in some pie charts. There is a possibility to change and add new categories of incomes, expenses and payments. Also, you can edit or delete your income or expense records.

“Budget application” - [link](#)

Technologies: C++, Cmarkup

Application for personal budget management. Allows to create many users in one computer. In single account you can add incomes and expenses, see balance of current month, of previous month and chosen period. Data is saving in xml format.

“Książka adresowa” - [link](#)

Technologies: C++

Application for saving address data. Additionally allows to search addressee by name or last name and show all addressee in address book. Data is saving in txt format.

## CERTIFICATIONS AND LICENSES

- Nokia Academy, XV edition – C++ profile
- „Projekt Przyszły Programista” – in progress

## EDUCATION

Vetarinarian: Veterinary

Uniwersytet Przyrodniczy we Wrocławiu

2013 – 2020
